## Situation and Challenge

### Time to market but fast and flexible!

The demands of your customers, of local and global markets as well as of legal conditions are constantly increasing. So you inevitably need to adapt quickly and appropriately at reasonable costs. This means your organization and business processes have to change, which also means your IT has to adapt. Today a business process can only be realized if the IT applications in use can provide the necessary support. That makes IT a key factor for market success.

### Potential Weaknesses

Enterprises often mention:

- Operating the heterogeneous system environment amounts to high costs.
- Systems cannot be extended or maintained Adjustment to new requirements is not possible.
- Different release-cycles of employed systems slow their operation.
- Our IT is not flexible; adjustments take too long and are very expensive.
- Many employees are needed to keep the system running.
- Business processes are distorted by accident-sensitive applications.
- Employees spend up to one third of their work time searching for information.
- A lack of matured and automated IT functions leads to inefficient business process operating.
- Bad rating under Basel II or no compliance with the Sarbanes Oxley Act because of security leaks in old applications.
- Media breaches cause mistakes and low quality of process handling.
- Problems with IT interfaces lead to communication problems, process shutdowns and high operating costs.
- Employees are dissatisfied.
- Customers are dissatisfied.
- The support of a consulting agency from another sector did not result in the desired efficiency improvement.
- New business processes require new applications of different suppliers

Perfect solutions brought to the point.

## Solution:

With SAP ERP (Enterprise Resource Planning) we provide you with an application from ERP market-leader SAP AG complying with almost all requirements.

	End-User Service Delivery				
Analytics	Strategic Enterprise Management	Financial Analytics	Operations Analytics	Workforce Analytics	
Financials	Financial Supply Chain Management	Financial Accounting	Management Accounting	Corporate Governance	
Human Capital Management	Talent Management		Workforce Process Management	Workforce Deployment	
Procurement and Logistics Execution	Procurement	Supplier Collaboration	Inventory & Warehouse Management	Outbound and Inbound Logistics	Transportation
Production	Production Planning	Manufacturing Execution	Enterprise Asset Management	Life-Cycle Data Management	
Sales and Service	Sales Order Management	Aftermarket Sales and Service	Professional Service Delivery	Foreign Trade	Incentive & Commission Management
Corporate and Support Functions	Real Estate Management	Product Development	Project Portfolio Management	Travel Management	Environment, Health & Safety, Quality Management
SAP NetWeaver™	People Integration	Information Integration	Process Integration	Application Platform	

SAP ERP provides appropriate IT support for all sectors.

An automotive supplier and an airline just do not process orders in the same way. So SAP ERP additionally provides process characteristics for different sectors. You can choose which characteristics you want to use and we support you in deciding.

By including SAP NetWeaver™ in its latest release, SAP has made sure that business processes can be adjusted and extended fast and appropriately. So with SAP ERP, SAP has provided an application system that can quickly adapt to the dynamism driven by the market and the customers. As there are more than 8,000 installations, often your customer uses the same system as you do.

If you decide for SAP, you decide for an application which will secure your investment for many years to come.

## How customers can benefit from the ASS.TEC offer

With the ASS.TEC SAP portfolio we offer our customers, mostly from the sectors of engine construction, plant construction, automobile and medical engineering, the exact IT tools and consulting services they need to introduce SAP ERP at reasonable costs and without losing much time. In doing so, we integrate your old applications or replace them with SAP ERP. We can resort to personnel and software expertise we gathered from many IT projects in the last 20 years.

On request, we completely supervise your SAP ERP systems via outtasking or via full outsourcing in our computing centre.

On request, we can offer you favorable financing via the SAP AG, even without incorporating your house bank.

### Strategy Consulting:

We help you devise the best long-term IT strategy you need to manage your business processes flexibly and promptly, according to the market and customer demands with your SAP ERP.

### Implementation of SAP ERP:

We support you or we fully implement mySAP ERP for you according to the successful Accelerated SAP Method (ASAP) and we support you via our helpdesk or on-site after the implementation project is finished. We do not leave you out in the rain.

### Support for SAP ERP:

With our helpdesk, computing centre (outsourcing) and our staff (outtasking) we can provide you with the support services you desire.

### Our consulting services focus on:

- Reimplementation of mySAP ERP with migration of or in co-existence with your old system throughout all business processes. Ask for our quite sophisticated data transfer concept.
- Operation of mySAP ERP release changeovers
- Improvement and reimplementation of business processes in your mySAP ERP
- Connection and integration of external applications and mobile devices into mySAP ERP, for example to monitor the material flow.
- Development of additional applications, reports and forms in mySAP ERP or via WEB Interface in ASP.NET (WEB services) and Business Server Pages (BSP) or WEB Dynpro, as a mobile service solution with seamless integration into mySAP ERP
- Development and optimization of mySAP ERP landscape with SAP NetWeaver
  - Enterprise Portal
  - SAP Business Warehouse
  - SAP Solution Manager
- Outtasking and outsourcing of your mySAP ERP system and IT department
- Integration of your heterogeneous system environment via the integration HUB X4 for the unification of all interfaces in XML, central monitoring and WEB services.
